## PROJECT

### Personal Portfolio Website

**Description :** A modern and fully responsive personal portfolio website designed to showcase my skills, projects, and contact information. The website includes smooth scroll animations, dark/light theme toggle, interactive skill cards, and a validated contact form. Deployed live using Netlify for real-world accessibility.

**Tools & Technologies :** HTML, CSS, JavaScript

### Weather App

**Description :** A responsive weather application that fetches real-time weather data using a public weather API. Users can search for any city to view current temperature, humidity, wind speed, and weather conditions. The app features a clean UI, error handling for invalid locations, and works smoothly across mobile and desktop devices.

**Tools & Technologies :** HTML, CSS, JavaScript, API
